

SpaceTraders.

DeFi Game on Binance SmartChain

Mikael Lazarev, Ivan Fedorov

About

Start your journey into the world of DeFi with SpaceTraders! Dive into fully realized crypto galactic, move between different planets, trade resources and earn **GOLD** tokens!

3 types of resources

The screenshot shows the game's user interface against a dark starry background. At the top left is the 'SPACE TRADERS' logo. Below it, the text 'PLANET VICRION' is displayed, followed by resource ratios: 'GOLD-OIL: 1.23 • GOLD-IRON: 2.23 OIL-IRON: 2.22'. To the right is a circular 'SPACE MAP' button. Further down is a large image of a futuristic spaceship flying over a blue gas giant. At the bottom, a descriptive text block reads: 'Blue gas giant with a complex planetary system. Galactical manufacturing center with large shipyards. Despite the fact that the planet is not rich in minerals, it has the most modern production facilities for the processing of metals and gold.' At the very bottom center is the copyright notice 'Copyrights 2020 © SpaceTraders'.

7 different planets

Each planet behaves like UniSwap and has different resource quotes (thanks for AMM).

Different levels of spaceship

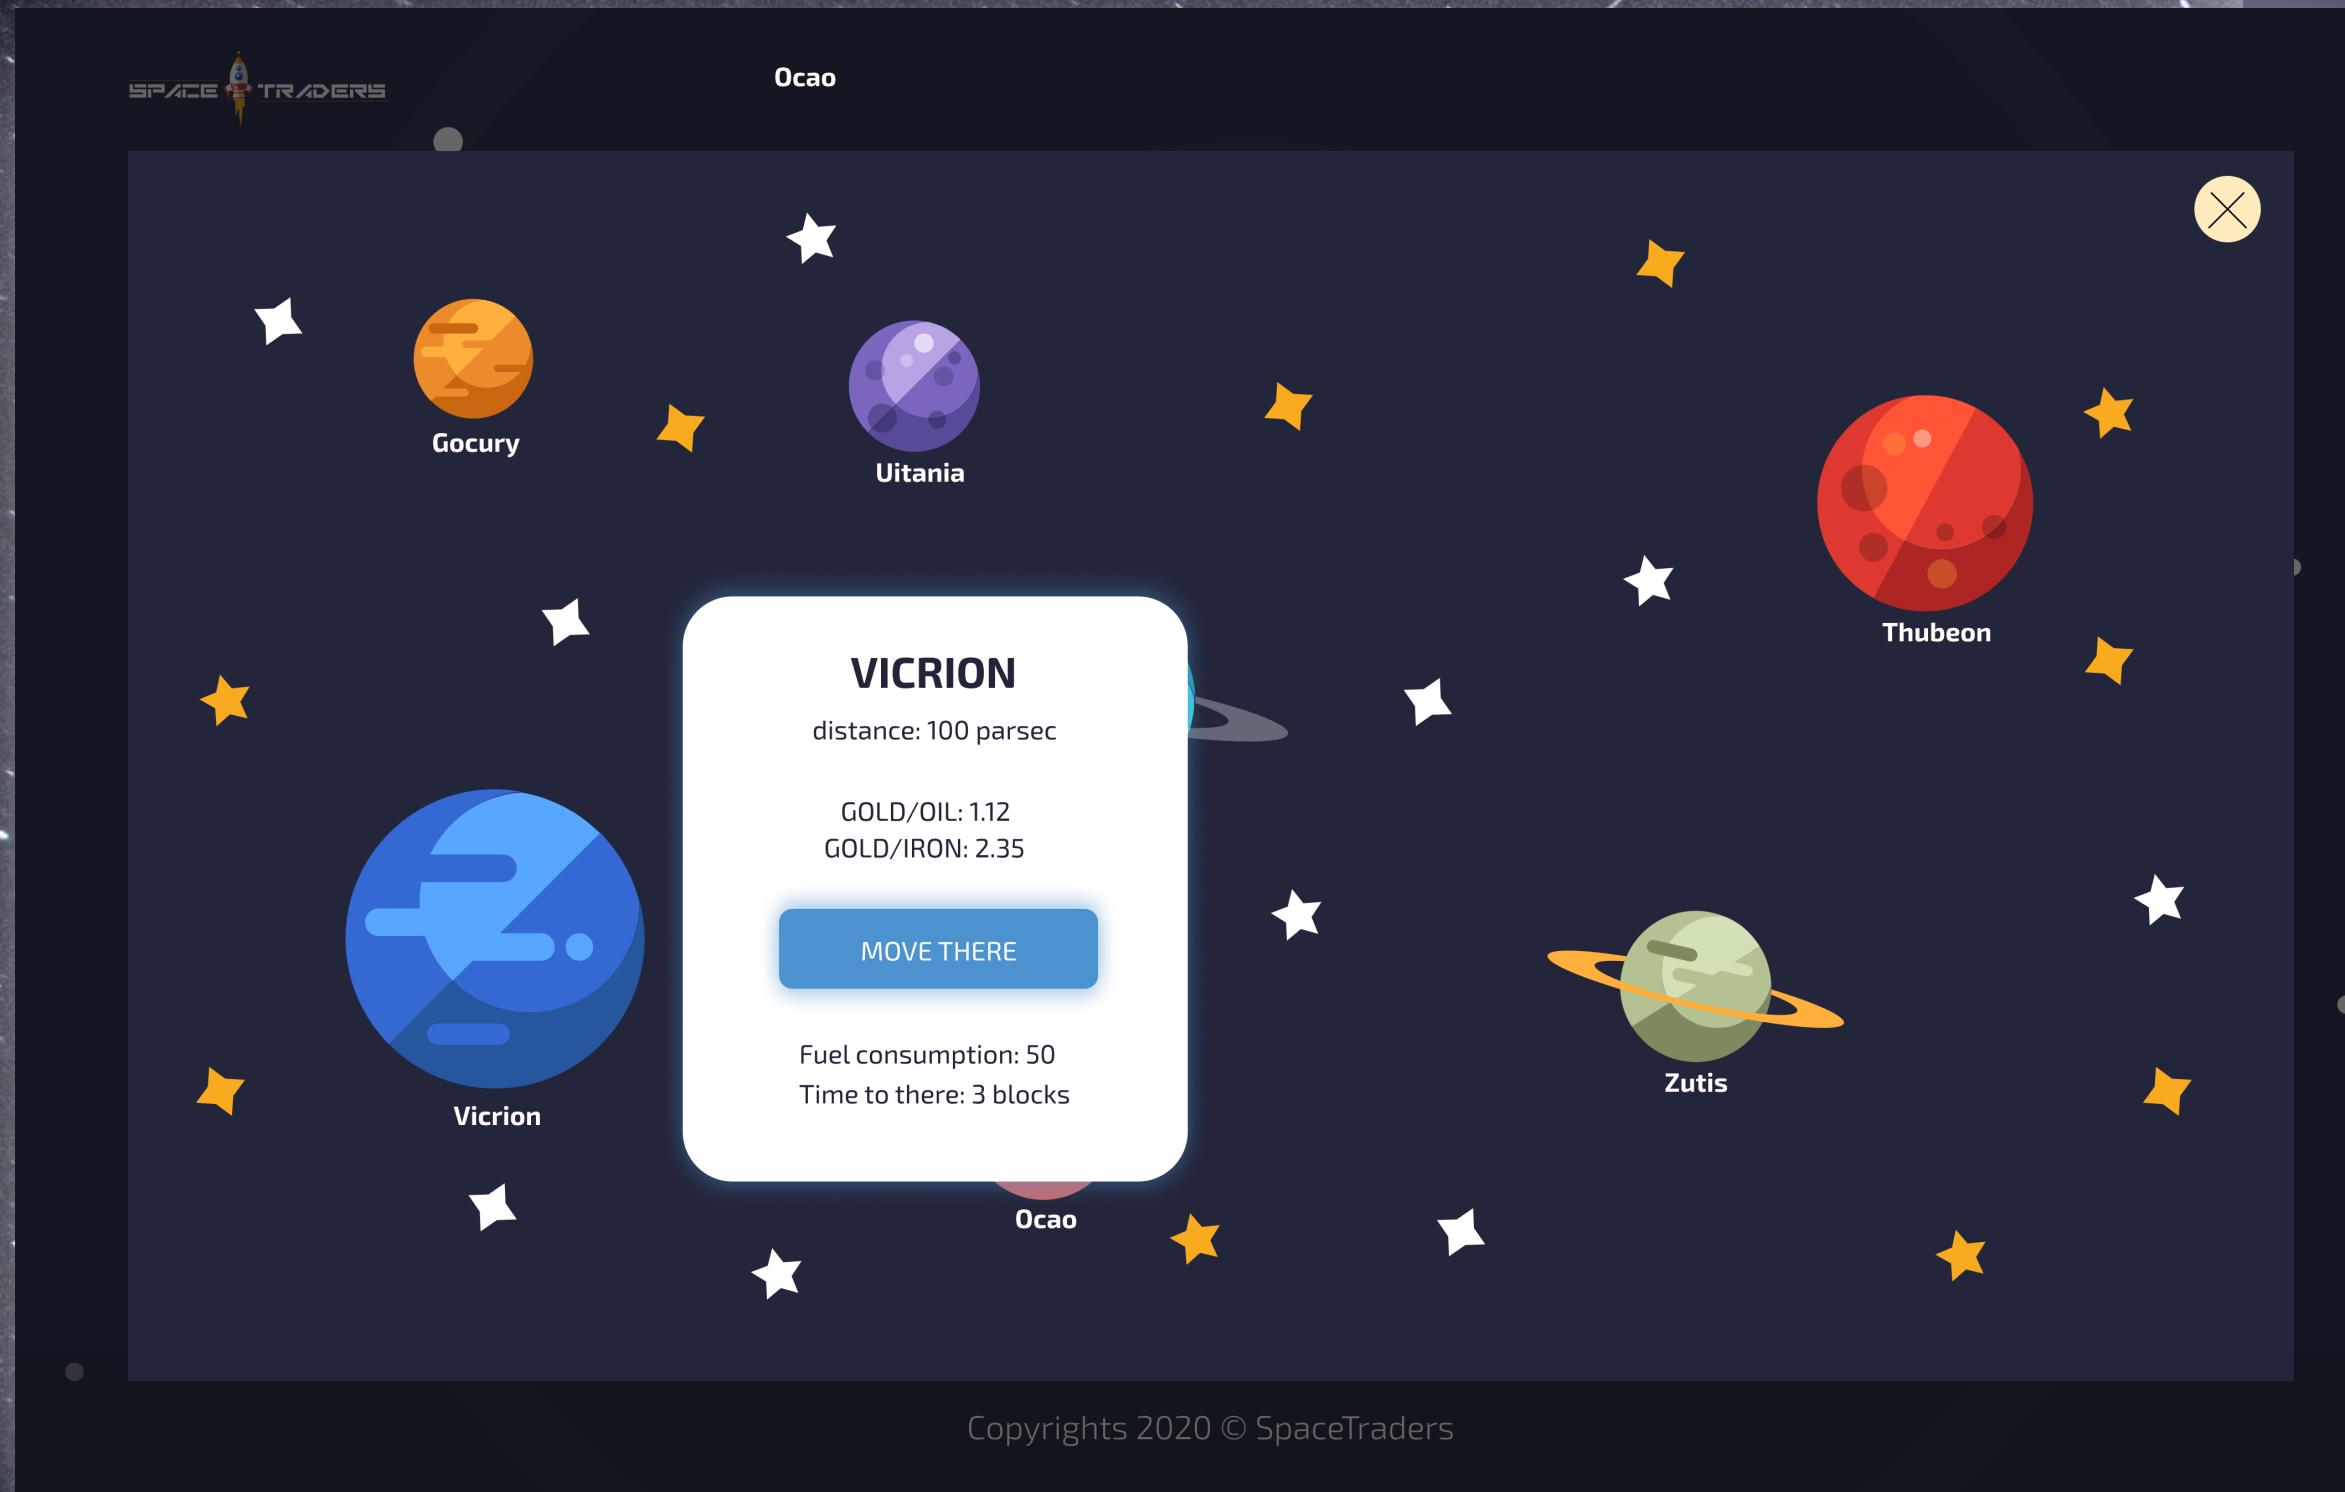

Each movement between planets costs **FUEL** and takes some blocks depends on your spaceship level.

To upgrade your spaceship you should spend resources **GOLD**, **IRON** and **FUEL**.

Trade & earn GOLD

You can experiment with different trading strategies of planets resources to earn the main resource – **GOLD**.

Team

Mikael Lazarev

Tech Lead and Founder with 10+ experience in software development with expert knowledge and skills in blockchain technologies and developing in key programming languages, co-founder of Saint-Petersburg Blockchain Developers Association.

Ivan Fedorov

PhD-student in Saint-Petersburg ITMO University with expert knowledge and skills in cryptography algorithms, blockchain technologies and information security.

Thank you for attention!
